Professional Summary

Computer Science and Engineering graduate from BRAC University with a published first-author research paper in *ICT Express* (Elsevier, Q1, IF: 4.2) on AI-driven zero-day intrusion detection using Siamese Networks and Reinforcement Learning. I build full-stack web applications using the MERN stack and work across machine learning, cybersecurity, and IoT systems. My projects are live and deployed — not just academic exercises. Currently open to opportunities in software engineering, AI/ML, corporate IT, and research roles in Bangladesh and beyond.

Education

Bachelor of Science in Computer Science & Engineering	2021–2026
BRAC University, Bangladesh	CGPA: 3.61/4.00
Higher Secondary Certificate (HSC)	2018–2020
Mirpur Cantonment Public School & College, Bangladesh	GPA: 5.00/5.00
Secondary School Certificate (SSC)	2016–2018
Greenview High School and College, Bangladesh	GPA: 5.00/5.00

Technical Skills

Systems & Security: Linux, Wireshark, Network Protocol Analysis, MySQL, Git
Web & Application: MERN Stack, REST APIs, JWT Authentication, MVC Architecture
Languages: Python, JavaScript, SQL, C
Tools & Deployment: Postman, Vercel, Render, TensorFlow, Scikit-learn

Projects

Trippy 2.0 – Travel Social Media & Tour Management System	<i>Apr 2026 – May 2026</i>
<i>Solo Project</i> · Live: trippy-2-0.vercel.app · GitHub: github.com/mhstyles7/Trippy-2.0	
- Rebuilt a full-stack MERN application end-to-end, integrating OCR for automated ID verification and secure JWT role-based access. - Architected secure, Postman-validated REST APIs using MVC principles to ensure scalable and maintainable backend operations.	
PothChola – Localized Smart Travel and Cultural Discovery Platform	<i>Dec 2025 – Feb 2026</i>
Live: poth-chola.vercel.app · GitHub: github.com/mhstyles7/PothChola	
- Led React frontend development and MongoDB schema design for a team-built MERN app, supporting complex group itineraries and social features. - Integrated Gemini AI and Google OAuth, and managed the full-stack cloud deployment pipeline across Vercel and Render.	
Air Quality Monitoring System (ESP32-Based IoT)	<i>Dec 2025 – Jan 2026</i>
Built real-time sensor monitoring system with automated threshold-based controls, Wi-Fi cloud data transmission, and local alert mechanisms — demonstrating experience with hardware-software integration and system reliability.	

Research

<i>A Cross-Dataset based Zero-Day Intrusion Detection System by Integrating Siamese Network and Reinforcement Learning</i>	
First Author · Accepted in <i>ICT Express</i> (Elsevier, CiteScore: 10.8, IF: 4.2) · doi.org/10.1016/j.icte.2026.05.001	
- Designed and led an AI-based network intrusion detection system targeting zero-day cyber threats across heterogeneous IoT environments — directly applicable to enterprise network security and threat monitoring. - Applied network traffic analysis and adaptive machine learning models (PPO/DQN/SAC) to detect anomalous behavior, demonstrating deep understanding of network security principles.	

Extracurricular & Additional Experience

Graphics Design (Beginner Level)	<i>Sep 2022 – Dec 2022</i>
Extracurricular Activity, BRAC University	
Social Media Manager	<i>Feb 2024 – Jul 2024</i>
Bangladesh Freight Forwarders Association (BAFFA)	
Managed digital communications for a senior executive holding five concurrent leadership roles across international freight, logistics, and trade associations; maintained a platform with over 68,000 followers, aligning content with institutional objectives and managing responsibilities independently.	
Competition Participant & Awardee	<i>2018</i>
IAM Digital Programme, conducted by Dr. Mohammad Kaykobad, Professor of CSE, BUET · Mirpur Cantonment Public School & College
